Drexel University
Philadelphia, PA 19104 USA

EDUCATION

Drexel University, Philadelphia, Pennsylvania USA
Ph.D. Candidate, Economics, September 2024–Present (Expected graduation date: June 2027)
Ph.D. Student, Economics, August 2022–September 2024
Advisor: Yoto V. Yotov
Completed Ph.D. coursework in international trade (theory and empirics), industrial organization, and econometrics

McGill University, Montreal, Quebec CAN

M.A., Economics, August 2021
Specialized in international trade under Ngo Van Long; completed additional advanced coursework in computational economics and forecasting
B.A., Economics, May 2020

RESEARCH INTERESTS

International trade: gravity modeling, sanctions, elasticity measurement, labor-market effects, and integration of geospatial modeling

Industrial organization: warranties, insurance policies, hidden attributes, and add-on pricing

WORKING PAPERS

“Transportation Choke Points, Trade, and Logistic Distance” **Job Market Paper, 2026**
Constructs a novel transportation-network-informed distance variable that incorporates realistic city-to-city routing into the Mayer and Zignago (2011) population-weighted distance formula, rendering bilateral distances responsive to infrastructure shocks. Applies the measure to the 2023 Red Sea crisis as a natural experiment, estimating a saturated gravity model in an event-study framework on monthly bilateral trade data.

“Automotive Tariffs, Spillover Effects, and the Used Car Market” **2025–2026**
Constructs a dynamically web-scraped dataset of approximately nine million U.S. used vehicle listings (April–October 2025) to study how automotive import tariffs propagate into the secondary vehicle market, using an event-study design around the 2025 tariff announcement and implementation dates and comparing price dynamics by country of manufacture and by brand origin.

“Time-Varying Distance and Trade” **2025–2026**
Extends the Mayer and Zignago (2011) population-weighted distance formula to allow bilateral distances to fluctuate over time using annual city-level population data from the mid-twentieth century onward, and analyzes within a gravity framework how long-run shifts in the spatial distribution of population have shaped bilateral trade patterns.

HONORS AND AWARDS

Drexel University: Fellow at the Center for Global Policy Analysis, 2025–Present; Dr. Tom Hinde-
lang Outstanding Ph.D. Student Instructor Award, 2025; Drexel Teaching Assistant Excellence
Award, 2024; Dragon Fellowship (\$2,500 per annum), 2022–Present

McGill University: Awarded Master’s Teaching Assistantship, 2020–2021;

Graduated with Distinction, 2020; Principal Student-Athlete Honour Roll, 2017

TEACHING
EXPERIENCE

Drexel University, Philadelphia, Pennsylvania USA

Course Instructor

September 2024–Present

Principles of Microeconomics (ECON 201): Fall 2024 and Fall 2025; Ph.D. Math Camp: Summer 2025; Intermediate Microeconomics (ECON 301): Spring 2026

Teaching Assistant

August 2022–Present

Facilitated restructuring of introductory microeconomics course for large-section formats, conducted office hours, graded, and ran occasional lectures

McGill University, Montreal, Quebec CAN

Teaching Assistant

August 2020–May 2021

Ran weekly recitations for introductory macroeconomics course and fielded questions in an online discussion forum

RESEARCH
EXPERIENCE

Drexel University, Philadelphia, Pennsylvania USA

Fellow at the Center for Global Policy Analysis

May 2025–Present

Worked on the development of a large-scale EQUIP trade simulation model, developed a geospatially founded logistical distance measurement, and designed and executed distributed estimation pipelines using HPC clusters (Slurm), scaling to 5,000+ PPML regressions with high-dimensional fixed effects

Research Assistant

December 2022–Present

Worked as an RA for Dr. Yotov, processing, analyzing, and trimming data from an extensive range of trade-relevant sources in R and Stata; wrote reports on and summarized trade-related policy papers

U.S. International Trade Commission, Washington, DC USA

Student Trainee (Economist)

July 2024–March 2025

Worked on a research project on the impact of population movements on international trade flows in the structural gravity framework; employed cutting-edge geospatial data and graph theory methods in Python to predict shipping routes between coordinate pairs and generate a new logistical distance variable; provided technical assistance to USTR

OTHER EXPERIENCE **Acentus Practice Management**, Mount Laurel, New Jersey USA

Billing and Claims Analyst (Intern)

August 2021–May 2022

Streamlined the healthcare billing process and sought to identify and remedy idiosyncrasies in denied payments for a major South Jersey medical network

Que Zhi Ling School, Montreal, Quebec CAN

Primary School Math Teacher

April 2020–August 2020

Taught primary school mathematics for a francophone private summer academy in Montreal

REFEREE SERVICE

Referee for *Defence and Peace Economics*, 2026

Referee for *Economics Letters*, 2024 and 2025

Referee for *Review of International Economics*, 2024

Referee for *The World Economy*, 2024

RELEVANT SKILLS	<i>Programming:</i> Stata, Python (Selenium), R, MATLAB <i>Computing/Tools:</i> Bash, Slurm (HPC job arrays), L ^A T _E X <i>Languages:</i> English (Native) and French (Fluent) <i>Methods:</i> Gravity modeling: estimation and GE analysis; use of geospatial data in Python; time-series forecasting
ADDITIONAL	Presented “Transportation Choke Points, Trade, and Logistic Distance” at Philadelphia Trade Group meeting (2025) Participated in Drexel Sanctions Workshop (2024) Took course in differential equations from Camden County College (Fall 2021) HIAS Refugee Welcome Center Volunteer (2018) Eagle Scout
